# PAPER TOOLS PRO™

## Without PAPER TOOLS PRO™

research papers are hard and results can be disappointing because students...

- become disengaged from their learning
- do not understand the information they read
- lack organizational and metacognitive skills
- do not document accurately

As web based software, PaperToolsPro™ is accessed and functions on the user's Internet browser from a PC or Mac computer.

## With PAPER TOOLS PRO™ research papers are easy, rigorous, but without plagiarism because students...

- Focus on understanding what they read by gathering information as notes in own words, identified by descriptors and keywords, and connecting new material to a network of gathered information
- Generate bibliography and citation entries in MLA, APA, ACS, CBE, AAAS, and Chicago styles
- Organize notes with a search query and transfer them with citations into an outline or rough draft on a word processing page
- Engage actively in learning content information without plagiarism

"My students absolutely love the program. It has been easy to learn and a wonderful addition to my curriculum."

Kristin Wilson  
Fieldcrest H.S., Mionok, IL

"If only I had it in high school and college! I think the interface is user-friendly and accessible."

Wailin Wong, Reporter  
Dow Jones Newswires
